Intro/Turnaround: [C ///|Am ///|F ///|G ///|]

Verse

```
C             Am        F
You hung the stars in space
F        G               C
You put all of them in place
        Am          F         G
And You know their names
C             Am    F
The moon and sun above
          G                      C
They are fashioned with Your Love
          Am            F      G
And Your Name they proclaim
    Am                 F
The seas are in Your hands
Dm                           G
You part the waters and I walk on dry land
```
